## Crestwood Manor Modesto

**Crestwood Manor Modesto** is a skilled nursing facility/special treatment program that is dedicated to the wellness and recovery of our residents. Our campus offers specialized services addressing dementia care, dual-diagnosis issues, social and life skills, as well as spirituality.

We have created a homelike, therapeutic environment for our residents, with comfortable living spaces, in a warm, welcoming and caring atmosphere. We also offer pet therapy and have a variety of pets that live at our campus such as cats, a rabbit, chickens, fish, a turtle and birds.

At Crestwood Manor Modesto we recognize the need for our residents to be productive and offer them the opportunity to work in our vocational rehabilitation program, including the Healing Harvest project where residents sign-up to work in our garden that has been county-certified for consumption of the food that we grow. Our residents also participate in peer-supported groups that focus on increasing our residents' social and life skills, medication education, as well as maintaining a healthy lifestyle.

## program

### Skilled Nursing Facility/Special Treatment Program

Skilled Nursing Facilities/Special Treatment Programs provide behavioral intervention to residents with mental health issues in secure residential settings. Primary services include mental and physical health education, vocational coaching and life and social skills training. Additionally, residents participate in Crestwood's innovative Wellness Recovery Action Plan program (WRAP), Dialectical Behavior Therapy (DBT) and Dual-Diagnosis groups.

Our Special Treatment Program's Activities Department also provides our residents with leisure activities and outings with staff.
